### **CHALLENGE:**

## **15-Minute City: Empowering Young Innovators to Create Sustainable and Connected Urban Living Solutions**

### **CHALLENGE DESCRIPTION:**

Are you passionate about improving the quality of life in cities and promoting sustainable living? Do you have innovative ideas for creating neighborhoods where everything people need is within a 15-minute walk or bike ride? If so, then our 15-Minute City Challenge is for you!

We are excited to announce this challenge, which aims to empower young innovators to create sustainable and connected urban living solutions that promote the 15-minute city concept. We are looking for creative and practical solutions that can help to make the 15-minute city a reality and contribute to the improvement of city politics and decision-making.

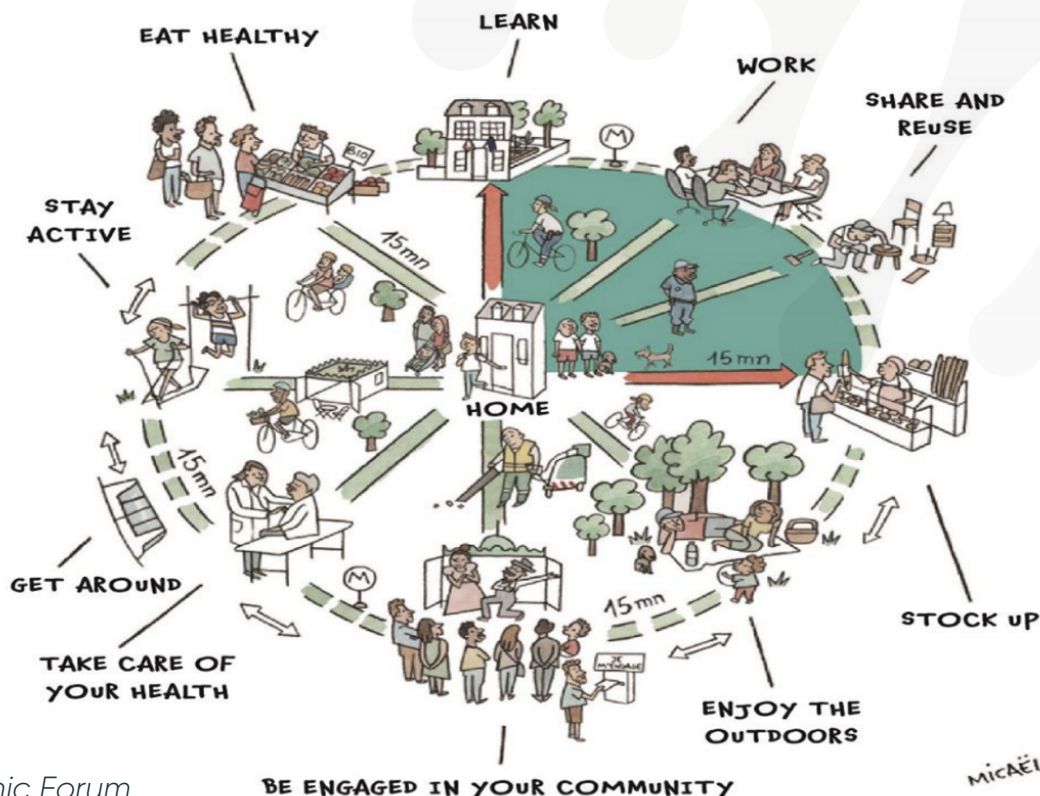

Participants are encouraged to bring their ideas with a business perspective, as a tool for city planning, or a tool to connect the private and corporate sectors to support the implementation of the 15-minute city concept. Potential solution areas could include improving public transportation, developing smart city technologies to connect people and services, promoting sustainable practices in businesses and households, or enhancing public spaces to support community interaction and collaboration.

By participating in this challenge, young innovators will have the opportunity to develop their skills, network with experts, and showcase their ideas to a wider audience. The challenge will also provide a platform for participants to collaborate with like-minded peers and gain valuable experience in developing sustainable and connected urban living solutions.

The 15-Minute City Challenge is your chance to make a real difference in your community and contribute to the improvement of city living. So what are you waiting for? Join us today and become part of the movement towards a more sustainable, connected, and livable future!

### The following data, that can help teams in creating their tools:

- Dataset of 23 types of infrastructure points in the city.
- Data on address points of family and apartment buildings in the city with an approximate number of housing units.
- Demographic data on the population of urban districts.

### HODNOTENIA A KRITÉRIÁ

Riešenia bude hodnotiť porota vybraná na základe ich profesionálnych skúseností. Projekty sa budú hodnotiť podľa nasledujúcich kritérií a na základe uváženia poroty:

- **40% potenciálny dopad riešenia (počet ľudí, ktorým dokáže pomôcť)**
- **30% komplexnosť a technologická implementácia** (odzrkadľuje, akým spôsobom tím aplikoval navrhnuté riešenie a hodnotí komplexnosť nápadu – jeho realizovateľnosť, implementovateľnosť a udržateľnosť)
- **30% kvalita a relevancia riešenia** (relevantnosť v kontexte výzvy a objem práce vykonanej počas hackathonu)

Dva tímy, ktoré sa umiestnia na prvom a druhom mieste s najvyšším celkovým skóre na základe platných kritérií pre hodnotenie, **získajú prize pool vo výške 3000 Eur a 2 000 Eur.**

**Hackathon bude prebiehať od soboty 1. 4. od 9:00, do nedele 2. 4. do 16:00 v Kusthalle, Rumanova 1, Košice.**

Bližšie informácie, ako aj časový harmonogram, nájdete priamo na stránke [Hack Košice](#).
